

ADVENTURES IN CRAFTING A DATA SCIENCE CAREER

Thursday, March 30, 2017

2:00pm - 3:00pm

URI Graduate School of Oceanography, Coastal Institute Building Auditorium

Join the University of Rhode Island Coastal Institute and RhodyRStats on Thursday, March 30th as we kick-off our “Careers in R” speaker series. Special guest Jasmine Dumas, a data scientist at Simple Finance, will share her journey from biomedical engineering to data scientist and highlight R packages that she developed, *ttbbeer* and *shinyLP*.

Please RSVP: <https://rhodyrstats-jasmine-dumas.eventbrite.com>

About Jasmine Dumas

*Ms. Dumas has a background in biomedical engineering, aerospace manufacturing, and product design & development. Through volunteer work and collaboration on scientific open source software in the R programming community, she successfully transitioned to a career in data science. Jasmine is now a Data Scientist at Simple Finance where she helps people feel confident with their money by making banking beautiful. Ms. Dumas is an active member of the R programming community with two published packages on the Comprehensive R Archive Network (CRAN) which focuses on increasing access to analysis-ready data (*ttbbeer*) and developing user-friendly interfaces (*shinyLP*). She enjoys developing open source tools to enable reproducible research and has contributed by participating in Google Summer of Code (Summer 2015) and NASA Datanauts (Spring 2017).*

What is RhodyRStats?

RhodyRstats is a Rhode Island based group of data scientists who work together to learn R, data skills, and statistics with workshops, trainings, and events throughout the year. To learn more about RhodyRStats, visit <http://rhodyrstats.org/> or contact hollister.jeff@epa.gov

Support for this event provided by the URI Coastal Institute. Learn more: <https://ci.uri.edu/>
